Batch 1 is our data prior to the 70 cut off (67 subjects)

Batch 2 is our first data set post the 70 cut off (34 subjects)

Batch 3 is our data set post deployment (61 subjects)

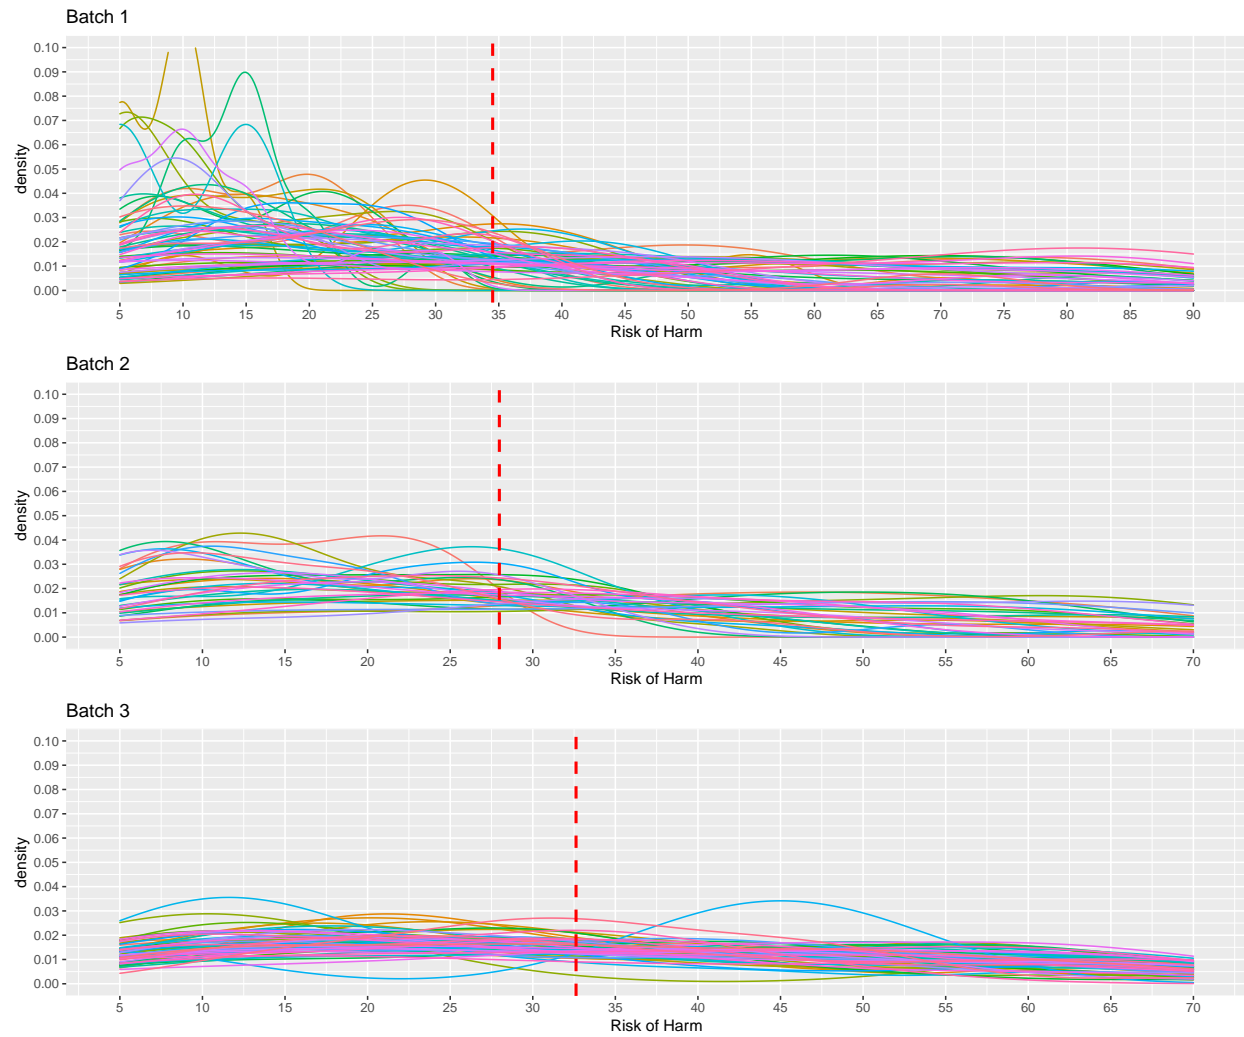

Here at side by side comparaisons of the 1st batch 2nd and 3rd batch total trial distributions.

```
grid.arrange(p1,p2,p3,p4,p5,p6,p7,p8,p9, ncol = 3)
```

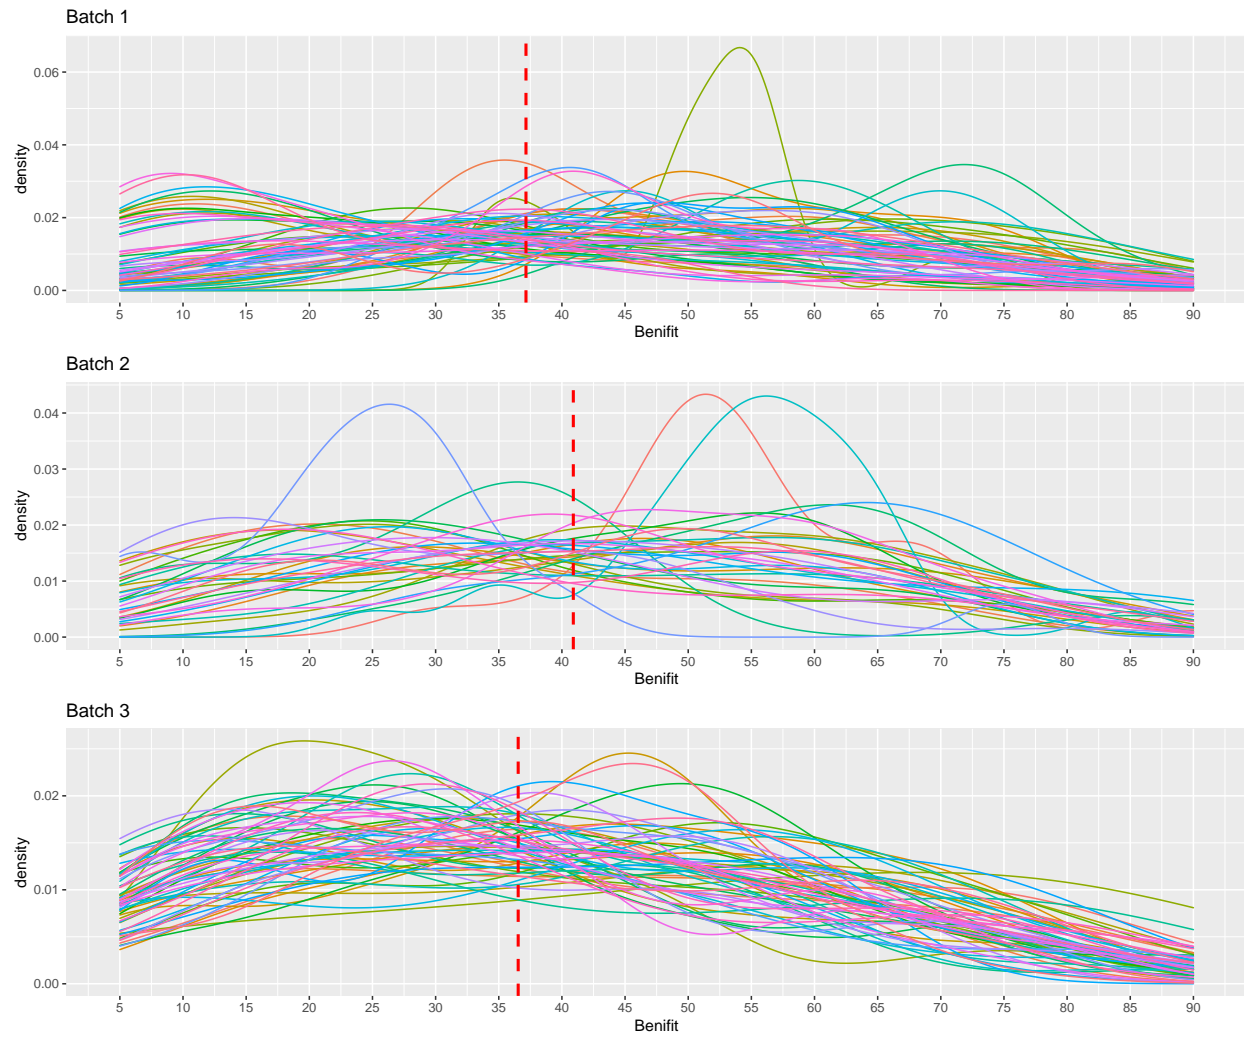

The x axis represents the probability that the cognitive deficit either has risk(orange), gain (blue), and no effect (grey) and our Y axis is the total count of observations where an expriemental treatment was chosen.

Warning: Groups with fewer than two data points have been dropped.

Warning: Groups with fewer than two data points have been dropped.

Warning: Groups with fewer than two data points have been dropped.
